2 NOTE FROM OUR FOUNDER & MANAGING DIRECTOR

Dear Investor,

We are excited to welcome you the release of our private credit, agricultural mortgage fund which is now open for investment.

We provide mortgage backed loans to help fund Aussie farmers who produce food and fibre – a critical sector to both the Australian and global economies.

Our investments fill the gaps left by mainstream banks who are often unable to help good quality farmers with significant equity in their farmland assets. The opportunities for our fund are significant. In calendar year 2024, through our proprietary deal flow network, FarmCap assessed 450 funding requests which continues to grow month on month.

We carefully curate the best private credit opportunities in the market and maintain an impeccable track record and reputation with borrowers, referral network, investors and industry professionals. Our credit process, risk and governance framework is robust and operate with independent oversight.

Our core values underpin everything we do and are proud of our hard work and commitment to Australian agriculture. We stand out with our specialist deep sector knowledge, networks and expertise combined with compassion, integrity and responsiveness. We build strong relationships with each borrower, meet every farmer on their land and actively participate in industry events.

This unique combination of skills, effort, focus and dedication is what ultimately sets us apart and is exactly what farmers have been screaming out for.

Investors can now participate in our pooled fund which provides access to a diversified pool of mortgage backed loans with additional liquidity and diversification, or alternatively invest directly in specific transactions via our contributory fund.

We offer a mix of predominantly first mortgage loans combined with selective higher yielding second mortgage loans. We value strong relationships with our investors and invite you to get to know us on a deeper level.

I look forward to collectively making a big impact on Australian agriculture while delivering market leading, risk adjusted returns to investors.

Make sure you get a spot in our fund as we expect to receive a strong reception upon our fund release.

New investors will also receive a unique and fun 'welcome pack' from FarmCap with a range of agricultural goodies!

The Fund Administrator has been appointed to provide the Fund’s back-office functions, including investor services, unit pricing and fund accounting.

4.6 Fund Structure

The Fund structure is as follows:

5 HOW THE FUND WORKS

5.1 Structure and Investor Eligibility

The Fund is a unit trust, whereby your money is pooled with other Investor funds. This means that you have access to certain investments and strategies that you may not otherwise be able to access on your own.

The Fund is only available to "wholesale clients" within the meaning of the *Corporations Act*.

To qualify as a "wholesale client", you are generally required to satisfy one of the following:

- An investment of at least \$500,000 (excluding Application Money sourced from superannuation) in the Fund; or
- An accountant's certificate, no more than two years old, confirming that the Investor (or any relevant entity it controls) has at least \$2.5 million in net assets or \$250,000 in gross income for the last two financial years; or
- Confirmed to be a 'professional investor' as defined in the *Corporations Act*; or
- A certificate from an AFS licence holder confirming the Investor as a "sophisticated investor" within the meaning of section 761GA of the *Corporations Act*.

The Fund is suitable for Investors who are looking for a vehicle to diversify their exposure to Australian real estate asset backed lending in an alternative asset class. The Fund aims to provide an attractive risk adjusted return exposure for investors who are seeking portfolio exposure in Australian agriculture assets. The Fund allows investors to participate in value creation for a traditionally underserved banking segment, by structuring tailored lending solutions to borrowers who have unique needs and circumstances. Each loan is secured by real estate (up to 75% LVR) and loans do not exceed 24 months in duration. The Fund solely focusses on agricultural / rural real estate asset backed lending, which also provides positive Environmental, social, and governance ("ESG") impacts through funding Australian farmers for food and fibre production, whilst providing a compelling investor returns.

5.2 Units and Unit Pricing

The Fund is unitised, meaning that when you invest in the Fund, you purchase Units that represent a beneficial interest in the Fund's assets (but not to any particular asset).

The calculation of Unit prices is set out in the constitution for the Fund. Initial Units will be issued at a price of \$1.00. Subsequent Unit prices are calculated by:

- determining the gross asset value of the Fund as at the relevant valuation day
- deducting any liabilities (including accrued fees)
- allowing for transaction costs of buying or selling the Fund's assets
- dividing the resulting net asset value by the number of Units on issue

The Trustee calculates both an Issue Price and a Withdrawal Price for Units. The Trustee calculates the Fund's Unit prices as and when required for the operation of the Fund. The Trustee may also set an Issue

FarmCap Private Credit Agricultural Mortgage Fund (Diversified)

Price that differs from the price determined above in special circumstances (such as for income reinvestments).

5.3 Initial and Subsequent Investments

A completed Application Form and Client Identification Form is required for both initial and subsequent investments in the Fund. These forms are available either on-line or in paper form from the Fund Manager.

When a completed Application Form is accepted, payment can be made via direct debit (bank details on application form). The Fund Manager reserves the right to refuse an application.

The Fund Manager's intention is to issue Units when funds are deployed into loans. Units will be issued when funds are deployed and at the Fund Manager's discretion. Funds may be returned at the discretion of the of the Fund Manager.

Applications are processed monthly and must be received at least 2 business days before the end of the month to be considered for that month.

5.4 Withdrawal Requests

An Investor can withdraw some or all their funds by sending the Fund Manager a completed withdrawal request form either electronically or via hard copy (subject to a 3-month notice period and the initial holding period).

After the Fund Manager has received and accepted a completed withdrawal form, withdrawals are normally paid within 40 days of the withdrawal date, although the Fund's constitution allows for up to 60 days.

Withdrawals will usually be credited directly to your nominated account.

In some other circumstances, the Trustee has the right to suspend or refuse withdrawals from the Fund. Examples of these circumstances are:

- Investors will be required to hold their investment for an initial holding period of 12 months
- When the withdrawal represents more than 5% of the Fund's assets
- Where the Fund holds illiquid assets, and it would be to the detriment of the Fund and other Investors to sell those assets

5.5 Transfers of Units

Investors wishing to transfer Units to a different entity must complete a standard transfer form, available by contacting the Fund Manager. The buying entity must be a "wholesale client" within the meaning of the Corporations Act and, unless it is an existing Investor, will be required to complete an initial Application Form and Client Identification Form.

A transfer of Units from one entity to another may have taxation implications and Investors should seek professional advice before proceeding.

5.6 Income Distributions

The Fund may earn income such as interest and may derive gains or losses on the sale of underlying assets. It is the Trustee's intention that the full amount of the Fund's taxable income that has been received by the Fund in each financial year will be distributed to Investors. Distributions are calculated quarterly and will be paid in arrears with 30 days' notice.

The distribution amount for each Unitholder is derived by dividing the total distribution amount by the total number of Units on issue at the distribution date, and multiplying the result by the number of Units you hold on that date. If you withdraw Units prior to the distribution date, you will not receive any distribution for the period you held those Units in the relevant distribution period.

You can choose to have your distributions:

- reinvested in further Units in the Fund; or
- paid to you by direct credit to your nominated account.

This choice is made on the application form. If you do not make a choice, or if a direct credit rejection occurs, then your distributions will be automatically reinvested by acquiring additional Units in the Fund at the Unit price applicable at the end of the relevant distribution period.

5.7 Keeping You Informed

The Trustee will provide periodical reports to Investors, along with updated Fund information. The reports provided to Investors include:

- a periodical valuation of the Investor's Units,
- a periodical report providing updated Fund specific information,
- a transaction statement including a statement of Unitholding at the time of any change in an Investor's Unitholding,
- the annual audited accounts of the Fund for each financial year; and
- annual distribution and tax statements.

The Trustee intends to provide the periodical reports on a quarterly basis.

6 RISKS OF INVESTING IN THE FUND

The purpose of this section is to inform you of the types of significant risks that may apply to an investment in the Fund and is a summary only. It does not purport to be a comprehensive statement of all the risks. The significant risks of the investment structure as well as those associated with the structure of this Fund are considered.

All investments carry risk including the potential for loss of income or capital, a less than expected rate of return or a delay in payment. Different investment strategies may carry different risk, depending on the assets that make up the investment strategy.

Some of the significant risks of investing in the Fund are summarised below.

6.1 Investment risk

The value of an investment in the Fund will go up and down in accordance with the value or performance of the underlying investments. This could result in the loss of any money invested in the Fund.

6.2 Credit risk

This is the risk that the issuer of a fixed income security (or counterparty) may be unable to meet its obligations to pay interest and principal when it is due.

6.3 Valuation Risk

The valuation of the security property for a Loan may be inaccurate or not accurately reflect its true value at the time the valuation is undertaken. If the valuation of the security property for a Loan is incorrect, then the amount realised on the sale of a security property may not cover the amount lent to the Borrower.

6.4 Market and economic risk

All investment returns are influenced by the performance of the market to which the underlying investments are exposed. These market forces may impact adversely on the global corporate debt market or listed equities market, which in turn could affect the performance of an investment in the Fund.

Market risk is the risk that an entire market, country or economy changes in value or becomes more volatile, including the risk that the country's credit rating is downgraded. This may be because, amongst other things, there are adverse changes in economic, financial, climate, technological, political or legal conditions, natural and man-made disasters, conflicts and shifts in market sentiment.

Changes in interest rates can also have a direct or indirect impact (negative or positive) on investment opportunities, returns and consequently the amount of income paid to Investors.

6.5 No guarantee of performance

FarmCap Private Credit Agricultural Mortgage Fund (Diversified)

Neither the money that an Investor has invested in the Fund, or the returns earned from their investment are guaranteed. A lack of performance by the Fund may mean there is insufficient income for the Fund to meet its investment objectives, particularly its yield objective.

6.6 Fund risk

The Fund could be terminated, the fees and expenses could change, the Fund Manager could be replaced, and other key personnel could change.

6.7 Key person risk

There is the risk that key individuals will no longer be able to fulfil their obligations in respect of the investment or administration of the Fund. The performance of the Fund may be dependent on the management skill of one or more individuals. If key personnel are no longer able to fulfil their obligations, there is a risk that the Trustee or the Fund Manager may not be able to find suitably qualified replacement personnel and the performance of the Fund may suffer as a result.

6.8 Limited operating history

The Fund is a newly formed fund with no operating history upon which Investors can evaluate its likely performance. There can be no assurance the Fund will achieve any of an Investor's investment objectives.

6.9 Tax risk

Tax and duty laws, and the regulatory interpretation or enforcement of laws can change, and changes can be adverse. Investors should consider their own circumstances before investing.

6.10 Liquidity risk

The risk that, due to the lack of marketability of an investment, the investment or underlying real estate security cannot be bought or sold quickly enough to return capital invested from a loan in a timely manner.

The Fund will predominately invest loans secured by registered mortgage over real property security, as such the Fund's assets may not be able to be converted into cash in a timely manner. This liquidity risk may impact the ability of the Fund to pay withdrawal requests.

Agricultural loans are governed by the Farm Debt mediation act in some states and this process may take time before the fund can appoint a receiver and commence recovery action against a borrower.

Investments in the Fund have a 12-month initial holding period and Investors will not be able to withdraw their investment within the first 12 months of their investment.

6.11 Counterparty risk

Counterparty risk represents the loss that would be recognised if counterparties (i.e. the other parties to the contracts) fail to perform as contracted.

6.12 Regulatory risk

This is the risk that the value or tax treatment of either the Fund itself or investments of the Fund, or the effectiveness of a Fund's trading or investment strategy, may be adversely affected by changes in government (including taxation) policies, regulations and laws affecting managed investment schemes, or changes in generally accepted accounting policies or valuation methods.

6.13 General Risk

The significant risks of investing in managed investment schemes generally include the risks that:

- The value of the investments will vary,
- The level of returns will vary, and future returns will differ from past returns,
- Returns are not guaranteed, and Investors may lose some or all of their money, and
- Laws change.

6.14 Risk Mitigation Strategy

As risk cannot be entirely avoided when investing, the Fund aims to identify and manage risk as far as is practicable. Whenever investments are made, the potential for returns considering the likely risks are assessed.

Risk is considered throughout the investment process. As far as is practicable, risk is managed at the Fund level in the selection of the various asset allocations. However, many risks are difficult or impracticable to manage effectively and some risks are beyond the Trustee's control all together. Investing involves risk, and you can lose as well as gain money. Neither returns nor the money you invest in the Fund is guaranteed.

The Trustee will seek to mitigate risk by undertaking the following:

- Investments will be in line with credit risk policies and approval processes

You should consult with your financial adviser to properly understand the risks associated with the Fund and your attitude to investment risk.

The Trustee does not guarantee the repayment of money invested, the payment of income or the Fund's investment performance.
